EPA Comments on AVX Phase III - August 2016.doc

Angela-

As we have discussed, EPA is providing the attached comments on the AVX Phase III Remedial Action Plan submitted by AVX on August 22, 2016. Please note that these comments are from the EPA Superfund program and do not represent comments from EPA's TSCA program. EPA's TSCA program may have additional comments. In the attached comments, we reference PCB surface soils and intertidal sediment data that we have collected on the Titleist property that we feel document that the OU1 contamination extends further east and south of the area delineated by AVX. We will provide that data to all parties as soon as we have permission from the property owner. Please let us know DEP's schedule for review and response on the AVX Phase III and what you see as the process and schedule for DEP approval of a final Phase III Remedial Action Plan. EPA would like to schedule a call to discuss the attached comments and clarify any questions or concerns DEP may have on the comments we are providing. Please let me know your availability for a call the morning of Friday the 23rd or any morning the week of the 26th. Thank you.
